-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a mirror assembly including mirror, substrate, shaft, holder and support, classified in class 359, subclass 872.
- II. Claims 2,15, drawn to a mirror assembly including specific mirror, substrate, shaft, holder and support, classified in class 359, subclass 872.
- III. Claims 3-7,10, drawn to a mirror assembly including mirror, substrate, shaft, holder and specific support, classified in class 359, subclass 872.
- IV. Claim 8, drawn to a mirror assembly including mirror, specific substrate, shaft, holder and support, classified in class 359, subclass 872.
- V. Claim 9, drawn to a mirror assembly including mirror, substrate, shaft, specific holder and support, classified in class 359, subclass 872.
- VI. Claims 11-14, drawn to a mirror assembly including two mirrors, substrate, shaft, holder and support, classified in class 359, subclass 850.

Art Unit: 2872

VII. Claims 16-24, drawn to a method for using a mirror assembly, classified in class 359, subclass 900.

VIII. Claim 25, drawn to a mirror assembly including two specific mirrors and a holder, classified in class 359, subclass 864.

IX. Claim 26, drawn to a mirror assembly including mirror and specific holder, classified in class 359, subclass 872.

2. Claim 1 link(s) inventions II-VI. Additionally, claim 26 links inventions V and IX. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s). Upon the allowance of a linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application.

Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the

Art Unit: 2872

instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I-VI, VIII and IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each of the inventions has separate utility as evidenced by their being separately claimed. Further, the claims of each of the inventions evidence that the combination does not rely on the details of the other inventions for patentability. See MPEP § 806.05(d).
4. Inventions I-VI, VIII, IX and VII are related as product and process of use, respectively. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the

Art Unit: 2872

product is not required to perform the claimed method steps of initialization, stepwise rotational advancement, etc.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Robinson whose telephone number is (571) 272-2319.
